

Complexity will slow your
forward motion

Untangle. Refocus.

That is our business

We make it

easier

to run your business

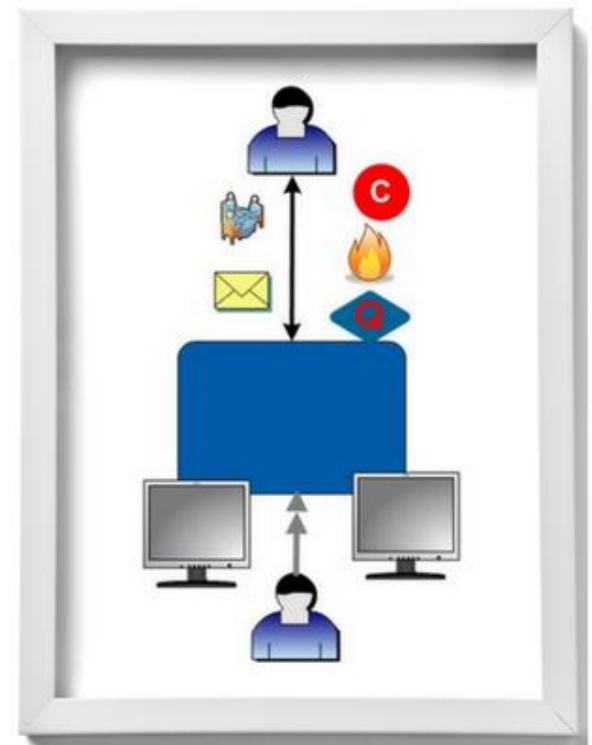

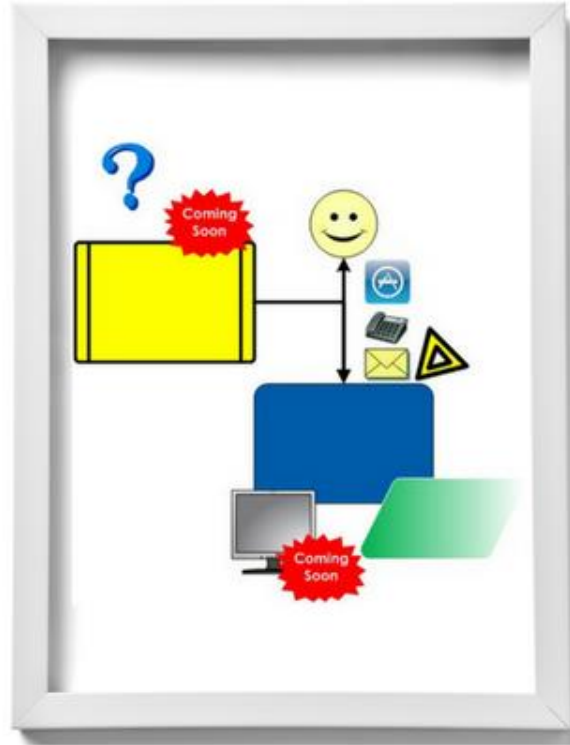

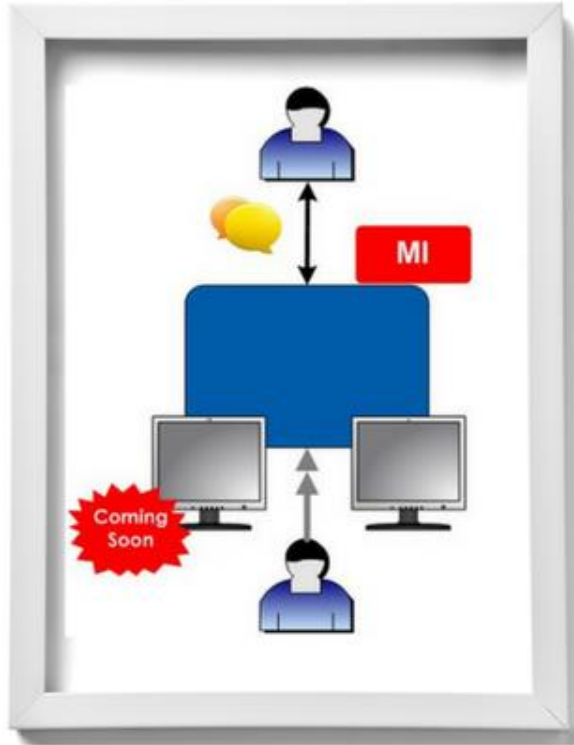

Pétanque International

WHAT WE DO

We help enterprises to move from complexity and vagueness, to focus and clarity. We untangle things by capturing business concepts in easy-to-grasp pictures to create a business narrative about common goals, how things work and what needs to be done.

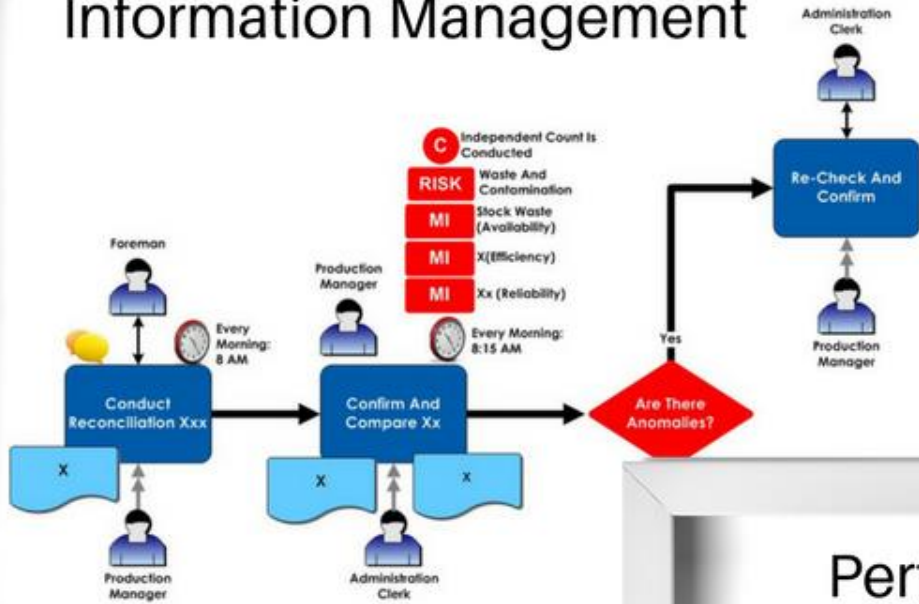

Introducing Visual Process Mapping - with VizPro®

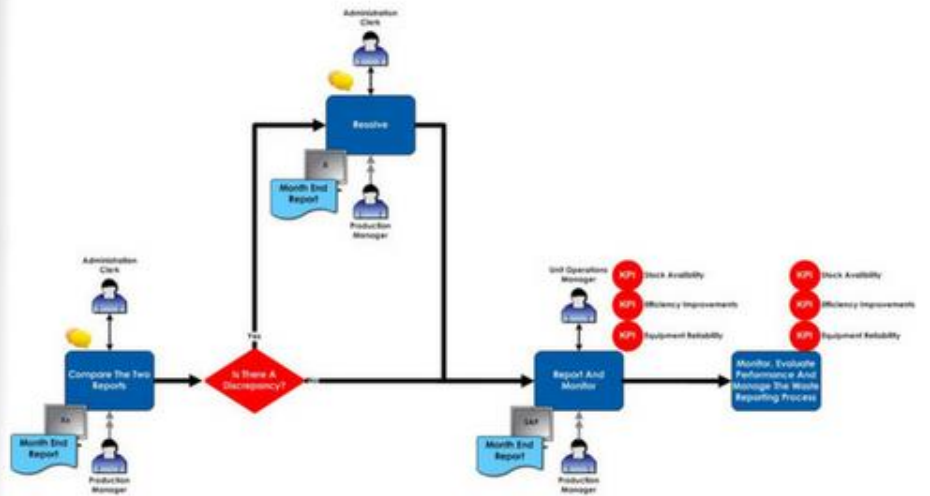

“ I've been doing process work for 20 years and this is by far the best methodology that I've ever used. It is easy to understand and gives a clear picture of who leaves off where, who communicates with whom and what systems are used.

Elizabeth Ledoux, vNacelle

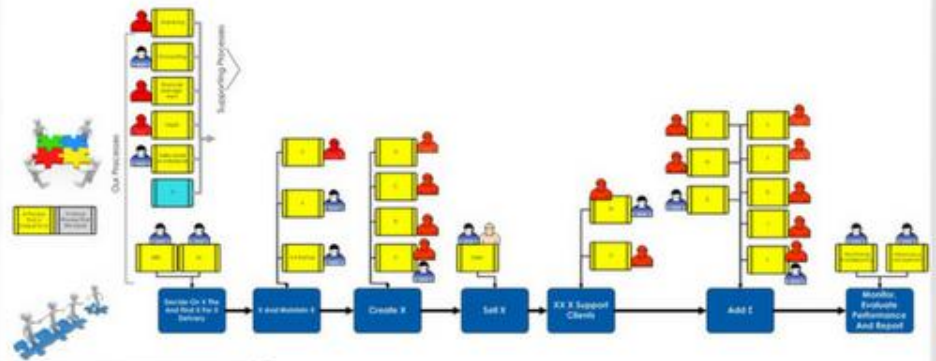

Information Management

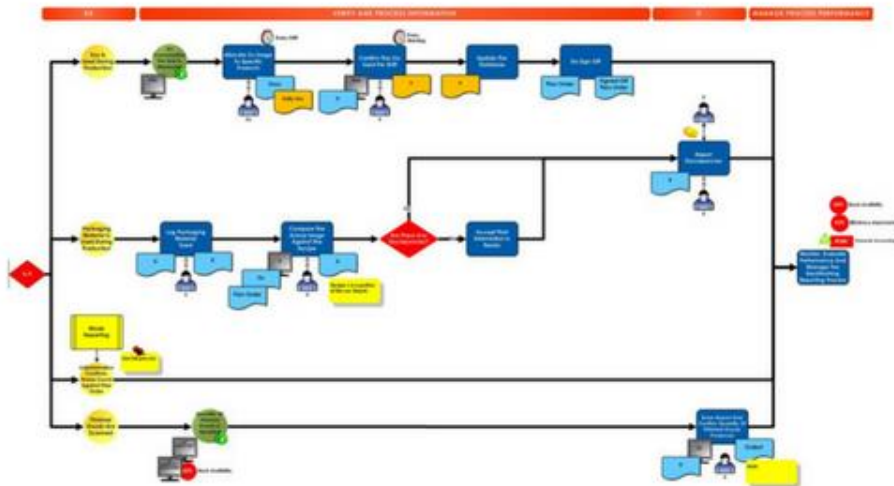

Performance Management

Positioning Map

A complete process

“ VizPro® is a very effective, 'user friendly' modeling tool and the re-usability capabilities of this tool is a plus point. Easy to understand and easy to learn.

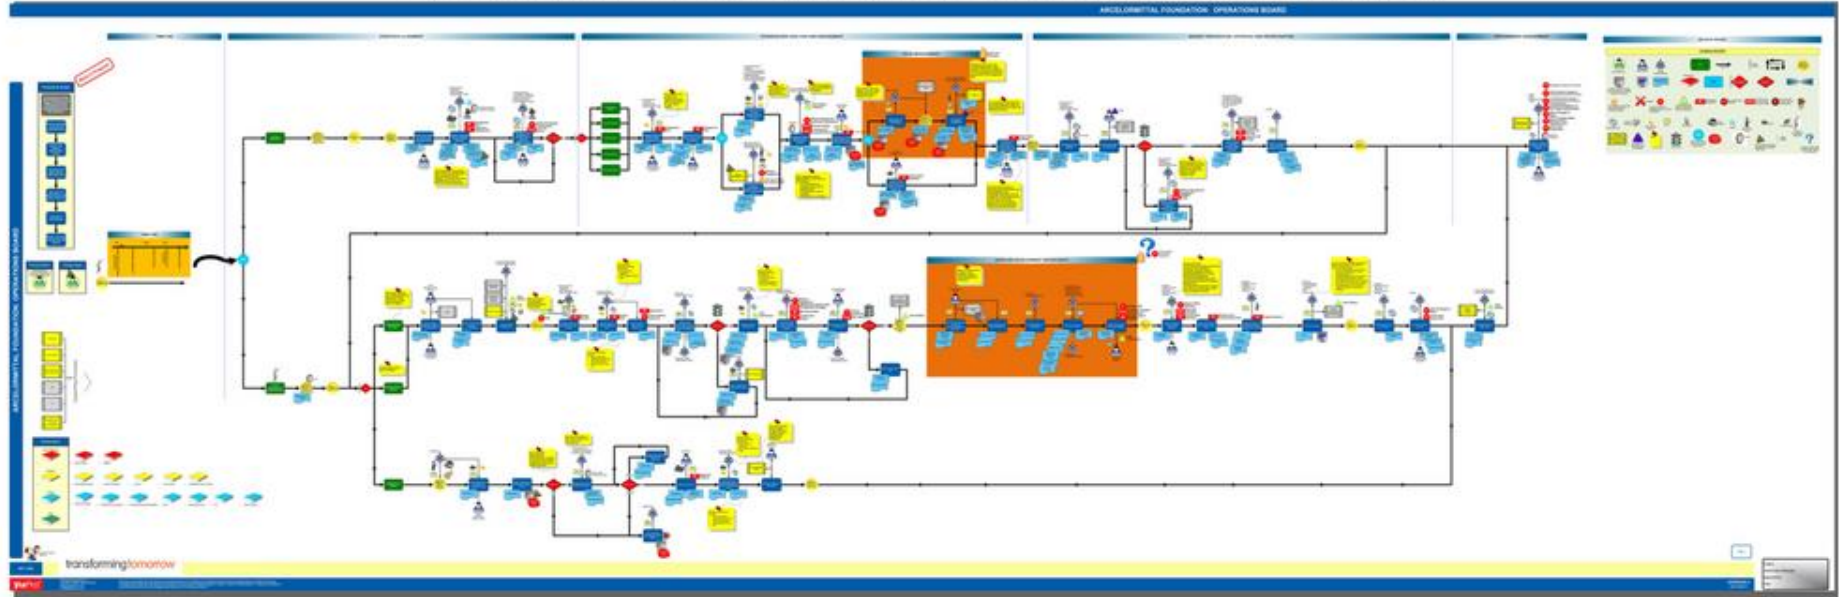

Urshula Dubber, Vodacom

Developed in a team environment, through intensive workshopping we ask questions, debate answers and draw the picture in real time.

Printed and laminated the visual process map can cover the entire length of a board room wall

We get everyone on the same page.

Literally.

It is quick, without lengthy questionnaires

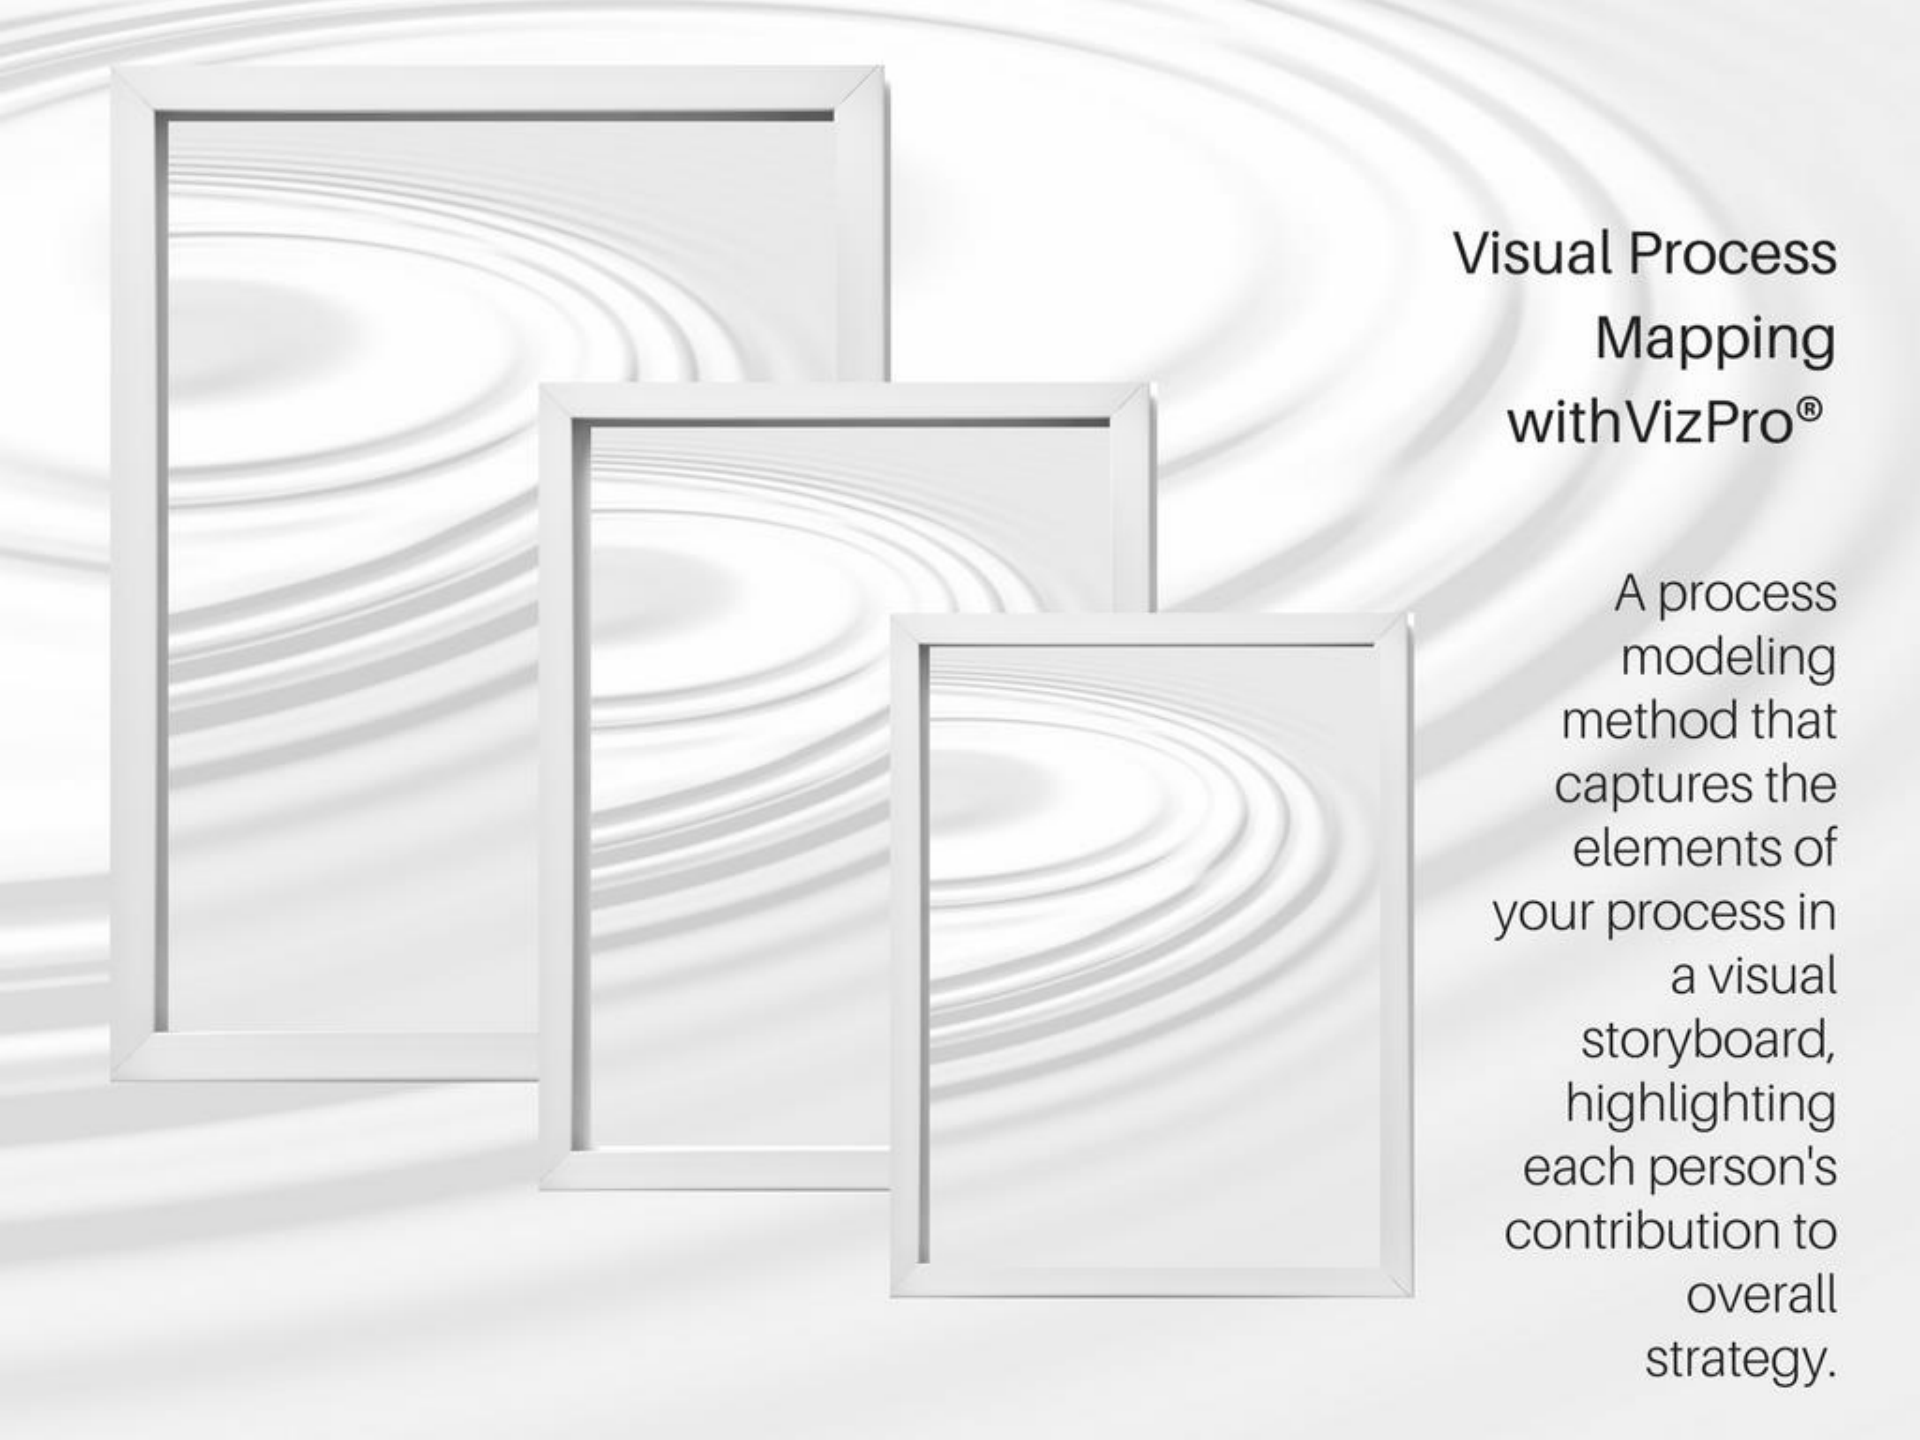

It is engaging, which ensures buy-in

It is easier to explain and to retain, because it is visual

The image features three overlapping white rectangular frames, each with a thin black border, arranged in a descending staircase pattern from top-left to bottom-right. The background is a light gray with a pattern of concentric white circles that create a sense of depth and movement, resembling a ripple effect or a tunnel. The overall aesthetic is clean, modern, and professional.

Visual Process Mapping with VizPro®

A process modeling method that captures the elements of your process in a visual storyboard, highlighting each person's contribution to overall strategy.
